

Amendments to the Specification:

Please amend the specification as follows:

Please replace the second full paragraph on page 12 (lines 16-22), with the following rewritten paragraph:

Further, since belt guide 27 is cooled by the air blasting from duct 36~~a~~, it is possible to prevent the temperature of conveying guide 24 provided above fixing unit 22 from rising and furthermore, make sheet paper P cool positively, accelerate the fixing of a toner image while sheet paper P passes through conveying guide 24 and prevent sheet paper P stacked in paper discharge tray 26 from adhering to each other for viscosity.
